

**AMENDMENTS TO THE SPECIFICATION:**

Please amend the paragraph beginning on page 4, line 34 as follows:

In use of the respirator air is supplied via the hose 9 (Figure 2) under a regulated positive pressure and enters the oronasal mask cavity 14 through ~~a one-way an inlet valve 15 fitted with a one-way valve~~ (Figure 4). Exhaled air is vented to atmosphere through a one-way outlet valve 16. A stream of air is also directed through ports (not shown) in the mask 10 to pass over the interior face of the lens 8 for demisting purposes, in accordance with known practice.
